

ICAP

GLOBAL. HEALTH. ACTION.

Columbia University
Mailman School of Public Health

Mali

● ICAP-supported regions by project.

Program Start

2011

Key Technical Areas

HIV Surveillance
Key Population Surveys
Monitoring and Evaluation

Current Funders

Centers for Disease Control and Prevention (CDC)

Current Projects

● **Strengthening Strategic Information for Health**

ICAP provides technical assistance and capacity building to the MOH and key stakeholders to strengthen national capacity to utilize data from strategic information activities, quantify and characterize the HIV epidemic among key populations, and enhance monitoring and evaluation systems for HIV and integrated health programs.

ICAP is partnering with the International Center for Excellence in Research to develop and implement HIV surveillance activities among men who have sex with men (MSM) in Bamako and miners in the Kayes region, and developing and implementing a national-level database to capture, manage, and disseminate HIV program data. This scope of work includes a bio-behavioral survey conducted among MSM to estimate HIV prevalence among this key population and inform targeted prevention programs. (funded by PEPFAR through the CDC)
