

## Start Date

2004

## Key Technical Areas

HIV Prevention, Care, and Treatment  
Population-based Surveys  
Key Populations  
Monitoring and Evaluation  
Quality Improvement

## Current Funders

Centers for Disease Control and Prevention (CDC)  
Children's Investment Fund Foundation (CIFF)

## Current Projects

### **Population-based HIV Impact Assessment (PHIA)**

ICAP is providing technical assistance and support to Tanzania's MOH to conduct a population-based HIV impact assessment (PHIA) survey to assess HIV prevalence, incidence, and access to prevention, care, and treatment services. The survey consists of household-based interviews and HIV counseling and testing for adults and children. Survey findings will be used to assess the impact of Tanzania's HIV response at a national level and to help guide and target future investment and programs. This survey is part of the PHIA Project which will conduct surveys in more than ten other countries in sub-Saharan Africa. *(funded by PEPFAR through the CDC)*

### **Global TA: Quality Improvement for PITC**

ICAP is providing technical assistance to Tanzania's MOHSW and the National AIDS Control Programme to improve provider-initiated HIV testing and counseling among pediatric populations in the Simiyu and Geita regions. ICAP is collaborating with local implementing partners in these regions to implement a quality improvement (QI) collaborative at high-yield pediatric facilities to improve PITC coverage and linkage to treatment of infected children. *(funded by PEPFAR through the CDC)*

### **Global TA: Accelerating Children's HIV/AIDS Treatment (ACT) Initiative**

ICAP is providing technical assistance to the MOHSW to expand and improve HIV testing and counseling for children and adolescents. This scope of work includes supporting the development of a pediatric HIV testing and counseling toolkit, developing monitoring and evaluation tracking tools, and working with partners to integrate quality improvement techniques in pediatric HIV testing and counseling service delivery. *(funded by PEPFAR and the Children's Investment Fund Foundation)*

### **Global TA: Fast Track Test and Treat for Key Populations**

ICAP is partnering with the MOHSW to support the planning, implementation, and evaluation of HIV test and treat (T&T) strategies for key populations. This includes: exploring new test strategies and innovative linkage and service delivery models; supporting Tanzania to implement T&T interventions for key populations and; documenting challenges and advantages of various models implemented.

# Tanzania

Additionally, ICAP is supporting the development of M&E tools necessary to monitor engagement of key populations along the continuum of care. *(funded by PEPFAR through the CDC)*

## **Global TA: Pre-Exposure Prophylaxis (PrEP) for Key Populations**

ICAP is partnering with the MOHSW to plan, design, and implement PrEP services for key populations. This scope of work includes: developing tools for PrEP guidelines and standard operating procedures; training health care workers; developing M&E tools to track uptake and retention on PrEP; monitoring programs and; evaluating PrEP implementation. *(funded by PEPFAR through the CDC)*

## **Completed Projects**

### **Technical Assistance in Support of HIV Prevention, Care, and Treatment and Other Infectious Diseases that Impact HIV-Infected Patients in Tanzania (UTAP2 Tanzania) (2009 - 2015)**

ICAP is provided technical assistance to support implementation of male circumcision (VMMC) services as part of a comprehensive package of HIV prevention activities in Kagera Region, including 20 islands in Lake Victoria. ICAP worked directly with Kagera Regional Hospital, Rubya Designated District Hospital, and with the Muleba District. Through the national Technical Working Group on VMMC, ICAP assisted with the development of assessment tools for monitoring and evaluation, and materials for information, education and communication. *(funded by PEPFAR through the CDC)*

### **Implementation of Programs for the Prevention, Care, and Treatment of HIV/AIDS (Endeleza Project) (2010 - 2016)**

ICAP collaborated with the MOHSW and Zanzibar to build capacity to expand HIV prevention, care, and treatment services at all levels of the health system, including psychosocial support to people living with HIV, VMMC and HIV prevention for key populations (people who inject drugs, men who have sex with men, and sex workers). ICAP partnered with a network of regional hospitals, laboratories, and primary health facilities in Kagera and Mwanza regions to integrate effective and sustainable services. *(funded by the CDC)*
