

Program Start

2005

Key Technical Areas

HIV Prevention, Care, and Treatment
Population-based Surveys
Nursing and Midwifery
Key Populations
Research

Current Funders

Centers for Disease Control and Prevention (CDC)
Health Resources and Services Administration (HRSA)

Current Projects

● Population-based HIV Impact Assessment (PHIA)

ICAP is providing technical assistance to Zambia's Ministry of Health (MOH) to conduct a population-based HIV impact assessment (PHIA) survey to assess HIV prevalence, incidence, and access to prevention, care, and treatment services. Survey findings will be used to assess the impact of Zambia's HIV response at a national level and to help guide and target future investment and programs. *(funded by PEPFAR through the CDC)*

● ESIS Task Order 4

ICAP is collaborating with the Centre for Infectious Disease Research in Zambia (CIDRZ) to conduct an evaluation to generate information about HIV prevalence among general and key populations. This information will be used to estimate HIV incidence and provide information about access to health services. *(funded by the CDC)*

● Nursing Education Partnership Initiative (NEPI)

ICAP is partnering with the MOH and the General Nurses Council of Zambia to build the capacity of health training institutions, enhance teaching and learning in the classroom and clinical settings, and ensure an adequate number of well-trained and qualified nurses and midwives. Through the NEPI project, ICAP develops innovative curricula to reduce time to accreditation, provides tuition assistance, and offers critical skills through online training in Option B+. Online at nepinetwork.org. *(funded by the PEPFAR through HRSA)*
