

●●● ICAP-supported regions by project

## Program Start

2015

## Key Technical Areas

Population-based HIV Impact Assessments  
Strategic Information

## Current Funders

Centers for Disease Control and Prevention (CDC)  
United States Agency for International Development (USAID)  
Bill & Melinda Gates Foundation

## Current Projects

### ● HIV Impact Assessment Survey (PHIA Project)

ICAP is providing technical assistance to the Ministry of Health and Child Care (MOHCC) to conduct the Zimbabwe Population-based HIV Impact Assessment (ZIMPHIA) survey to assess HIV prevalence, incidence, and access to HIV prevention, care, and treatment services. The survey comprises household-based interviews and HIV counseling and testing services for adults and children. Survey findings will be used to assess the impact of Zimbabwe's HIV response at the national level and to help guide and target future investment and programs. *(funded by PEPFAR through the CDC)*

### ● Strengthening Strategic Information for Health

ICAP is providing technical assistance to strengthen epidemiology and strategic information (SI) to inform evidence-based HIV programs and policy. Activities aim to support the MOHCC to plan and coordinate SI activities, improve monitoring and evaluation, and enhance surveillance systems to characterize the HIV epidemic and effectiveness of the response. The scope of work also includes strengthening human resources to support country ownership of sustainable SI activities. *(funded by PEPFAR through the CDC)*

### ● HIV Coverage, Quality, and Impact Network

The HIV Coverage, Quality, and Impact Network (CQUIN) is a multi-country learning network designed to accelerate the implementation of high-quality differentiated care for HIV in member countries across sub-Saharan Africa, including Zimbabwe. Through CQUIN, ICAP supports countries to generate new knowledge and tools to advance differentiated care, and facilitates learning about the science of scale-up. In Zimbabwe, CQUIN supports a Differentiated Care Coordinator, who is seconded to the Ministry of Health; a study assessing barriers and facilitators of men's engagement in HIV treatment and differentiated care; and work to identify differentiated care models for patients with advanced or unstable HIV. *(funded by Bill & Melinda Gates Foundation)*

### ● OPTIMIZE

The OPTIMIZE project is dedicated to rapidly improving treatment outcomes for people living with HIV by optimizing antiretroviral drugs and formulations, and accelerating their introduction in low- and middle-income countries, including Zimbabwe. *(funded by USAID)*
